

Exit Grease

Normal 'quick-break' degreasers contain solvents and as such are environmentally unfriendly. Heavy duty grease cleaners can be caustic, and will sometimes even harm the item being cleaned. They are therefore not always safe to store and use around the home or workplace.

Exit Grease™ is a non-caustic, water soluble, heavy-duty & general purpose cleaner for the safe removal of grease and oil. Formulated without solvents & to be non-caustic, non-flammable and non-toxic, it is the leader in the field of environmentally safe degreasers.

Grease Problems

Cleaning up grease or oil is always a task and a half - grease seems to spread wider with every wipe, often making matters worse. The barrage of cleaners available can stuff a cleaner's cupboard full to bursting. But now there is one safe product you can rely on anywhere, to tackle any task. From a child's fingerprint to a commercial kitchen, or an oil puddle on the driveway to a locomotive workshop - no job is too big or too small for Exit Grease.

"Safe and easy tough stuff"

technical specifications

Composition: Quaternary ammonium compounds, biodegradable surfactants and water
Appearance: Blue mobile liquid
Treatment: Apply neat or diluted as required. For heavy grease apply, leave for 5 minutes, then remove with strong jet of water
Flammability: Non-flammable

Flash point: N/A
Application: Spray or brush onto area to be treated. Can be used as a bath. Sensitive skin sufferers should consider wearing gloves
Poisons: Non-toxic
Shelf life: Indefinite

product applications

- Exit Grease can be used on workshop floors (it will not discolour concrete), factory walls and anywhere around mechanical workplaces. It will displace even the heaviest of grease.
- Exit Grease is commonly used with great effect in transmission centres, around locos and rolling stock.
- In automotive cleaning applications, Exit Grease will not harm paintwork, alloy wheels or trim and is excellent at cleaning brake dust off drums and wheels.
- Being non-caustic, Exit Grease will not affect other materials such as paints, boat decking or concrete.
- It is safe to use in the kitchen, ovens, hotplates, bathrooms, showers, toilets etc.
- Formulated without perfume so that it will not taint food, Exit Grease is safe enough to clean BBQ plates and grills, and is approved for use in food preparation areas.

easy to use

- Applied by spray, Exit Grease penetrates deeply after just one minute. Give it some time to work - it does not contain harmful solvents, so will not produce instant "stripping" results.
- For heavy grease, apply by brush and allow 5 minutes for the product to penetrate the grease.
- Can also be used as a bath.
- Hose off with a strong jet of water.
- Exit Grease can even be diluted up to 50:1 for light applications such as cleaning windows.

available sizes

- 750ml spray bottle for easy application
- 1 and 5 litre jerricans for economy at greater quantities

naturally safe

Exit Grease is non-toxic, non-caustic and solvent free and therefore safe to use around the home, or for employees at work. Water soluble and formulated with biodegradable surfactants, it is not only safe to use, it will not harm surfaces or the environment. In fact it is so harmless it can be used in food preparation areas.

at a glance

- Heavy industrial to light domestic uses
- Environmentally responsible
- Safe to use & to store
- Non caustic & solvent free
- Will not harm surfaces
- Suitable for use in food preparation areas
